FYI - How is the Natural End pledge created? The Natural End pledge is compiled from documents and practices used primarily in the US, the UK and elsewhere by providers that support natural choices at the end of life. **The agreement provides a baseline for minimum natural options families seeking the service are likely to expect; many providers offer more.** Periodically we update the Pledge. We'll contact you at your e-mail address if we've made significant changes, and you'll have an opportunity to review them. We welcome your feedback, and hope you'll find this service helpful.

** There is no state law that we're aware of that prohibits public viewing of unembalmed bodies. Please contact Natural End if we're in error here! Thanks!*
